DETAILED ACTION

Drawings

1. The drawings were received on 8/4/09. These drawings are approved.

Specification

2. The disclosure is objected to because of the following informalities: The brief description of drawings recites figures 6a-6c, however only a single figure 6 was submitted.

Appropriate correction is required.

Election/Restrictions

3. Newly submitted claim10 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The brick adjustable along a longitudinal or vertical axis.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 10 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3618

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 5-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shum (US 6,105,975 A) and in further view of Rebicek (US 2,988,369 A).

Shum discloses an ice skate comprising an under-skate assembly including a resilient frame section with open sections 30, 40 and elastic springs 61, 48, and removable blade 19, as shown in figures 1-7. Shum does not disclose a flexible push-click mount blade. Rebicek does disclose a skate comprising a flexible, push-mount blade 10, as shown in figures 1-5. It would have been obvious to one having ordinary skill in the art at the time of the invention to have provided the skate of Shum with the flexible blade of Rebicek in order to easily replace the blade.

Response to Arguments

1. Applicant's arguments with respect to claims 5-9 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
